# The Global Goals

Our business is based on the fact that our customers, employees, suppliers and the market we operate in have confidence in us and the values that we represent. We operate in an environment with high expectations and thereby have a responsibility to both society and our customers. This means, among other things, delivering products and services based on high quality and a good judgment in all parts.

Our operations are regulated and thus good risk management, regulatory compliance, internal control and control are important prerequisites. Fundamental to our actions is our sustainability policy which is based on the UN Global Compact's 10 principles. We safeguard a culture where every employee feels responsible for acting ethically and following applicable regulations.
